**NOTE:** Most installation problems can be solved by referring to the Troubleshooting Section of this Manual.

**VERY IMPORTANT:** If you are connecting the printer using a USB cable, you must follow the instructions regarding USB INSTALLATION for your particular Operating System.
Windows XP - USB INSTALLATION

These steps must be followed if you are connecting a Datamax Label Printer to your Windows XP computer using a USB cable. Before you begin ensure that the printer is securely connected to both your computer and a power outlet.

1. Connect the printer to your computer using the included USB Cable
2. Turn the printer ON
3. The computer will display the New Hardware Found Wizard, click Cancel

![New Hardware Found Wizard]

4. Insert the Datamax Accessories CD that came with your printer
5. When the Main Menu opens, click Install Windows Driver

![Datamax Accessories CD-Menu]
6. When the License Agreements opens, select **I accept the terms...** and click **Next**

7. When the installation directory windows appears, click **Next**

8. Uncheck **Read installation instructions** and click **Finish**
9. Wait for the **Seagull Driver Wizard** to open. If the Seagull Driver Wizard does not open automatically, click the **Seagull Driver Wizard** on your Windows toolbar. It will be flashing at the bottom of your screen.

10. Select **Install printer drivers** and click **Next**

![Seagull Driver Wizard](image)

11. Select the **Datamax E-4203/4204/4205** from the list. **Be sure to note the USB port next to the printer, you will need this information later in the installation.** Click **Next**.

![Seagull Driver Wizard](image)

*Please check below the printer to verify your model*
12. Make sure **Use as default printer** is unchecked and click **Next**

![Add Printer Wizard](image1.png)

13. Click **Finish**
14. Click **Close**
15. Click the **Windows Start Button** and select **Control Panel**
16. Once in the Control Panel, click **Printers and Other Hardware** or **Printers and Faxes**
17. Click **Add a printer**
18. The **Welcome to the Add Printer Wizard** window appears, click **Next**

![Add Printer Wizard](image2.png)

19. Select **local printer attached to this computer** and deselect (no check mark) **Automatically detect and install my plug and play printer**, click **Next**
20. Click the port drop down arrow and select the **USB #** that was noted in Step 11, click **Next**

![Add Printer Wizard: Select a Printer Port](image1)

21. From the list of Manufacturers (left column), select **Generic**, and from the list of Printers (right column), select **Generic/Text Only**, click **Next**

![Add Printer Wizard: Install Printer Software](image2)
22. DO NOT change the printer’s name (should be Generic/Text Only) and DO NOT make this printer your default printer (answer no), click Next

23. If asked about printer sharing, select Do not share this printer and click Next
24. Choose No when asked if you would like to print a Test Page, click Next
25. Click Finish
26. Once your computer is finished copying files, close the Printers and Faxes folder and any other windows that are still open

Your printer is now installed and ready for use with the Datatagger® Label Printing System for Windows. Skip to the software installation instructions on page 18.
Windows 7 and Vista - USB INSTALLATION

These steps must be followed if you are connecting a Datamax Label Printer to your Windows Vista computer using a USB cable. Before you begin ensure that the printer is securely connected to both your computer and a power outlet.

1. Connect your printer to the computer using the supplied USB cable
2. Turn the printer ON
3. The computer will display the Found New Hardware Wizard
4. Click Cancel

5. Insert the Datamax Accessories CD
6. When the Main Menu opens, click Install Windows Driver
7. When the License Agreements opens, select **I accept the terms...** and click **Next**

8. When the installation directory windows appears, click **Next**

9. Uncheck **Read installation instructions** and click **Finish**
10. Wait for the **Seagull Driver Wizard** to open. If the Seagull Driver Wizard does not open automatically, click the **Seagull Driver Wizard** on your Windows toolbar. It will be flashing at the bottom of your screen.

11. Select **Install printer drivers** and click **Next**

12. Select the **Datamax E-4203/4204/4205** from the list. **Be sure to note the USB port next to the printer, you will need this information later in the installation.** Click **Next**.

*Please check below the printer to verify your model*
13. Make sure **Use as default printer** is unchecked and click **Next**

14. Click **Finish**
15. Click **Close**
16. Click the **Windows Start Button** and select **Control Panel**
17. Double-click **Printers**
18. Click **Add a Printer** and the Add Printer Wizard will appear
19. Click **Add a Local printer**
20. Click the existing port drop-down arrow and select the **USB #** noted previously in Step 12.

![Choose a printer port](image1.png)

21. Click **Next**

22. Select **Generic** as the Manufacturer and **Generic/Text Only** as the Printer, click **Next**

![Install the printer driver](image2.png)
23. Uncheck **Set as the default printer** and click **Next**

![Add Printer dialog box](image)

24. Click **Finish**

Your printer is now installed and ready for use with the Datatagger® Label Printing System for Windows.

If you are using Windows 7, continue to the software installation instructions on page 17

If you are using Windows Vista continue to the software installation instructions on page 18.
Windows XP – PARALLEL / SERIAL INSTALLATION

Follow the steps below if you are installing your printer on a Windows XP machine. Before you begin ensure that the printer is securely connected to both your computer and a power outlet.

1. Click Start → Control Panel
2. Once in the Control Panel, click Printers and Other Hardware
3. Click Add a printer
4. The Welcome to the Add Printer Wizard window appears, click Next
5. Select local printer attached to this computer and deselect (no check mark) Automatically detect and install my plug and play printer, click Next
6. Choose the port where your printer is connected, click Next
   a. If the label printer is connected to the same port as a laser/ink jet printer, the port is LPT1
   b. If the label printer was shipped with a custom grey 9-pin-to-9-pin cable, the port is COM1 or COM2, depending on the actual port being connected to on the back of the PC.
7. From the list of Manufacturers (left column), select Generic, and from the list of Printers (right column), select Generic/Text Only, click Next

![Add Printer Wizard](image)
8. **DO NOT** change the printer’s name (should be Generic/Text Only) and **DO NOT** make this printer your default printer (answer no), click **Next**

9. Select **Do not share this printer**, click **Next**

10. Choose **No** when asked if you would like to print a Test Page, click **Next**

11. Click **Finish**

12. Once your computer is finished copying files, close the **Printers and Faxes** folder

Your printer is now installed and ready for use with the Datatagger® Label Printing System for Windows. Skip ahead to the software installation instructions on page 18.
Windows 7 Datatagger Software Installation

Installation of the software is a simple, single CD process. Before beginning the installation, make sure you exit all programs on your computer.

1. Insert the **Datatagger for Windows Installation Disk** into the CD-ROM tray on your computer
2. Open **My Computer**
3. Open your **DVD/CD-ROM drive**
4. Double-click on the folder called **Runtime**
5. Double-click on **ACCESSRT**
6. Click the button to go back to the previous window
7. Double-click on the **Datatagger for Windows** folder
8. Right-click on the **Datatagger** icon and choose **copy**
9. Close the current Window
10. On your desktop, Right-click where you want **Datatagger** to go and choose **Paste**
11. Datatagger installation completed successfully
Windows XP and Vista Datatagger Software Installation

Installation of the software is a simple, single CD process. Before beginning the installation, make sure you exit all programs on your computer.

12. Insert the **Datatagger for Windows Installation Disk** into the CD-ROM tray on your computer
13. Open **My Computer**
14. Open your **CD-ROM** drive, it will say **Datatagger 13.0** on the name
15. Double-click **Setup**
16. When the **Datatagger for Windows Setup** window opens, click **OK**
17. Click the large button with the computer to begin the installation

![Datatagger for Windows Setup](image)

18. When asked to choose a Program Group, click **Continue**
19. Once the installation is complete, click **OK**

Your software is now installed and ready to use.
Using the Software

To start the Program, click Start → Programs → Datatagger for Windows → Datatagger to bring up the Main Menu.

The Main Menu displays the different Label Formats available to print. The formats are listed with the Label Part Number, e.g. TT306 to facilitate label selection.

To select a particular label format, click the appropriate button on the Main Menu to display the format screen.
The Label Format Screen

The Format Screen provides all of the tools needed to enter, edit, save and print labels.

Screen Features

- The upper left hand corner of the screen displays the format name.
- The label stock part number is displayed right below the format name.
- The upper right hand corner of the screen contains the label information look-up list.
- The main part of the screen contains the fields for the particular label format selected, along with system function buttons such as Add and Delete Item, Print, Item Summary Report and Exit.
Entering Label Information

Before any labels can be printed, the label information must be entered into the system. It is not necessary to enter every item into the system at one time, only those items for which labels need to be printed. Once information for an item has been entered, it is automatically saved and can be printed immediately, or recalled for printing, editing or deleting later if necessary.

To enter label information:

1. From the Main Menu, select the label format desired
2. Enter the information to be printed in the fields displayed. Hitting ENTER or TAB on the keyboard moves the cursor to the next field.
3. When entering the information for the label, it is not necessary to enter a print qty unless the label is to be printed right away. NOTE: The print quantity is not saved with the rest of the label information.
4. When finished entering the information for a label, the information can either be printed immediately or saved for printing at a later time. To Save the information, click the Add Item button. For more information on Printing the label, go to page 21.

NOTE on Data Entry: On label formats with a barcode, the item number is the field that will print as both a barcode and text. On these formats, the item number also serves as the lookup number – the value used to recall label information at printing time. On non-barcode formats, the lookup value is entered in the lookup field on the left of the label entry screen, above fields 1-4. This value is used to recall the label’s information and will not print on the label, unless it is also entered in one of the other lines on the screen.
Printing Labels

Once label information has been entered, it can be printed immediately, or recalled later and printed on demand.

To Print Immediately:

1. After entering the label information, click in the **Print Qty** Field
2. Enter the number of labels to print
3. Click the **PRINT** button
4. To print additional labels, click the **PRINT** button again

To Print from Previously Saved Information:

1. From the Main Menu, select the label format desired, and the Format Screen will display
2. Click the small drop-down arrow in the **Lookup Box** located in the upper right corner of the Screen to display a list of the lookup/item number values entered
3. With the mouse, or using the up and down arrow keys on the keyboard, select the label that you wish to print
4. When selected, the values entered will automatically fill in the fields on the screen
5. Click inside the **Print Qty** field, and enter the number of labels you wish to print
6. Click the **PRINT** button with the mouse to print the labels selected
7. To print additional labels, enter the **Print Qty** and click the **PRINT** button again
8. To print a different set of labels, repeat steps 2-6
9. To return to the **Main Menu**, click the **Exit Door** in the lower right corner of the screen

Print Summary Tags

Datatagger for Windows contains a special feature that allows you to automatically print one of every label entered without having to select values from the Lookup Box.

1. From the **Main Menu**, select the label format desired, and the **Format Screen** will display.
2. Click the **Print Summary Tags** button – one of every label entered will automatically print.
3. To repeat the process, click the **Print Summary Tags** Button again
4. To return to the **Main Menu**, click the **Exit Door** button
Item Summary Report

The Item Summary Report displays a report of all the label information entered for the selected label format. This report can be printed on a regular laser or ink-jet printer.

1. From the Main Menu, select the label format desired, and the Format Screen will display.
2. Click the Item Summary Report button to display the Item report on screen.

3. To print the report on a laser printer, click the File Menu at the top of the screen and select Print.
4. When finished, click the File Menu and select Close to return to the Label Format Screen.
The Large Print Option (where available)

To use the large print option:

1. From the Main Menu, select the label format desired
2. Click the **Large Print Option** button on the right side of the screen (refer to page 11 for button location)

**NOTE:** The large print option is currently available on select labels only. If you do not see a large print option button, that option is not yet available for your label style.

**NOTE:** Refer to the previous page for instructions on entering label information.
Using Excel Import Feature

With Datatagger for Windows 13.0 you can import your label data from a Microsoft Excel spreadsheet. However, there are several guidelines that must be followed in order to import the data properly:

- Excel spreadsheets must have the exact number of columns as fields on the label format, including the Lookup/Item Number
  
  **Ex:** TT306 with Barcode format has 1 Item Number field and 4 Description fields, for a total of 5 fields. So, your spreadsheet would need to have 5 columns.

- The 1st column of your spreadsheet will always be the Lookup/Item Number field on your label and this column must contain all unique values.

- The number of characters (including spaces) in each individual cell on your spreadsheet should not exceed the maximum field length for the label format you are using. **NOTE:** All extra characters will be cut off and will not be printed.

- You must create the following directory on your computer: `C:\DatatagXL`

- All Excel spreadsheets must be saved in the `C:\DatatagXL` directory

- Your spreadsheet must be named for the label format where you wish to import that data.
  
  **Ex:** If you are using the TT306 Text Only format, your spreadsheet must be named 306T.xls
  
  **Ex:** If you are using the TT345 with Barcode format, your spreadsheet must be named 345B.xls

**NOTE:** Templates for the Microsoft Excel spreadsheets have been included on your Datatagger for Windows Installation Disk.
After you have met all of the guidelines mentioned on the previous page, follow the steps below to import your data.

1. From the **Main Menu**, select your label format
2. Click **Import Excel Data** to transfer the information from your spreadsheet into Datatagger

3. A window will appear telling you that Datatagger finished importing Excel data, click **OK**
4. You must now exit your label format, click the **Main Menu** button to do so
5. Once again, click the button for your label format.
6. You can now view and print each of your records by selecting the corresponding unique value from the **Lookup Drop-Down List**.

If you are having difficulty importing your data, make sure you have met all the guidelines previously mentioned then contact Arch Crown Technical Support at 800-526-8353, between 9 a.m. and 5 p.m., M-F, Eastern Standard Time.
Troubleshooting and Technical Support

Most common problems can be solved before calling Technical Support by referring to this section.

Q: When I click Print, one label prints, then the printer skips a few labels, and then the rest of my labels come out fine.
A: This is NORMAL. When the printer is first turned on, it must sense the height of the labels. This happens automatically the first time that you print after turning the power on, by feeding a few extra labels. This can be avoided by pressing the FEED button on top of the printer once the Paused light turns off.

Q: When I click on the Print button, I get a message stating that “This document was previously formatting for the Printer Generic Text Only”, which is not available.
Or
When I click on the Print button, the yellow (Pause) light on top of the Printer blinks, but then nothing else happens.
A: The Generic Driver required to print on the label printer is not installed. Refer back to the Printer Installation section at the beginning of this manual to install the correct driver. After installation of the driver, re-install the software.

Q: When I click on the Print button, a page comes out of my regular printer, but nothing happens on the Label printer
A: Make sure that the correct cable is connected to your label printer. If you selected LPT1 during the installation of the Printer, the Label Printer should be plugged into the same place where your desktop printer is typically connected.

Q: The printer started to print a label, but now the red Fault light on top of the printer is on, and nothing prints.
A: The Fault light means that there is a problem with the way that the labels and/or ribbon are loaded in the printer. Make sure the roll of labels is loaded in the printer all the way to the left, and that the ribbon is traveling through the correct path in the printer mechanism. For assistance loading labels and ribbon, consult the Operator’s Manual included with your printer.

Q: When the printer prints, the correct number of labels comes out the printer, the Fault light is not on, but the labels come out blank.
A: The ribbon is loaded with the wrong side facing the labels. Only the inner surface of the black ribbon actually contains “ink”. The ribbon must be loaded so that this surface faces the labels. One way to test this is to stick a piece of Scotch tape to the surface of the ribbon that faces the labels, and then peel the tape off. If the tape comes away with black on it, then the ribbon is loaded correctly. If the tape comes away clean, then the wrong surface of the ribbon is facing the labels and the ribbon should be reversed.

(continued on next page)
Q: The Printer prints, but nothing prints on the right side of the labels. Only the left side shows printing.
A: This happens when the printhead (the mechanism that holds the ribbon spindles) is not locked all the way down prior to printing. Make sure that the large green lever on the right side of the printer is completely locked around the small black plastic tab in the printhead mechanism.

Q: The Printer prints, but nothing prints on the left side of the labels. Only the right side shows printing.
A: This happens when the roll of ribbon is not pushed all the way down on the ribbon spindle. Make sure that the ribbon is pressed all the way to the left until it will not go any farther, the left edge of the ribbon should line up with the left edge of your labels.

Q: The printer only printed 4 of the last 5 labels that I asked for
Or
The printer always prints 1 less that I put in the Print Qty field
A: The printer will print the exact number of labels requested, but the last label printed will always be under the cover of the printer, so it is not visible. Push the FEED button on top of the printer to expose the last label printed.

Q: When I click on the Print button, I get an error message on the screen that says the “Action cannot be completed…”
A: This usually happens when you enter a number in the Item Number field that you have previously entered for another item. Change the Item Number to a unique value and try to print again.

If you still have difficulty with the system after consulting the above, please call Arch Crown Technical Support at 800-526-8353, between 9 a.m. and 5 p.m., M-F, Eastern Standard Time.
